

emagic CMS.Net

Content Management, Site Management and Portal Management

Server requirements

- Windows Server 2003
 - IIS 6.0 or later
- MS .NET Framework 2.0
 - MS SQL Server 2000, 2005 (Express) or MSDE
- emagic CMS.Net license
- dtSearch license (if needed)

Client requirements (website administration interface)

- XP or Vista
- Internet Explorer 7.0 or later

Security

- Active directory authentication via LDAP (extranet/intranet) - Single Sign-On
- Content approval & publishing
- Content scheduling
- Data versioning
- Document & Image security
- eID authentication (extranet/intranet + administration interface)
- Real-time link verification
- Role-based administration rights
- Secure administration interface
- Session management (ASP.NET State Server)
- SSL (login, pages, communities)

Performance

- Built-in AJAX technology
- Load balancing via replication

	Page caching
	
Support	
	Commercial Support
	Commercial Training
	Demo framework for testing & development
	Detailed User Manual
	Extensive API
	Extensive Technical Manual
	Integrating Partner Network
	Module templates
	Online help
	Professional hosting
	Professional services
	Public FREE forum
	Public mailing list
	Upgrade subscription
	
Interoperability	
	Completely .NET based
	Content syndication (RSS)
	Event architecture
	Extendable framework with custom modules/applications
	External content & XML feeds
	International character set support (e.g. UTF-8)
	Open architecture
	XHTML compliant
	
Ease of Use	
	Ajax-enabled administration interface (remote scripting)
	Auto check-in option
	Autogenerated dataparts
	Built-in statistics
	Bulk delete option
	Content scheduling
	Image editing
	Image resizing
	Internal search (on pages, dataparts, documents, images, users)
	Mass upload
	Reuse of content
	Right-click sensitive menus & Drag-drop functionality
	Search engine friendly url's
	Thumbnail creation
	

	User-friendly Web-based administration interface
	Virtual staging
	Wysiwyg editor + spell checker
Flexibility	
	Accessibility for visually impaired users
	Creation of print-friendly pages
	Flexible licensing structure
	Inheritance on all levels
	Interface localization
	Multi-Community deployment
	Multi-lingual editing
	Multi-lingual sites
	Multi-Site deployment
	Template-driven design
	URL rewriting
Modules	
	Breadcrumb
	Document gallery
	Dynamic menu
	eID authentication
	External content
	Extranet security
	Form Generator
	Generic datapart control
	Image gallery
	Mailform
	MS Office 2003 connector
	Multimedia
	Newsletter
	NTLM Authentication via LDAP
	Page navigation
	Replication (for load balancing)
	Rotator
	Search connector (dtSearch)
	Sharepoint Portal Server 2003 connector
	Sidemenu
	Sitemap
	Structured content (multi-lingual) (News, Press releases, Jobs, Events, Products, ...)
	Syndicated content (RSS)
	Textarea (multi-lingual)
	User management

	Wysiwyg editor (multi-lingual)
	XML feed
	

Sitemap management	
Add/modify/delete pages	
Adding of page comments	
Adding pages to the menu structure	
Automatic page navigation	
Cascading approve/publish	
Cascading online/offline	
Content reuse	
Content scheduling	
Different page types: content, folder, application, external url	
Dynamically adding of dataparts	
Editing cycle: check-out/edit/check-in/approve or disapprove/publish	
Inheritance of page properties	
International character set support (e.g. UTF-8)	
Language matrix (multi-lingual sites)	
Live/design environment	
Max 99 sites/subsites per community	
Meta data per page	
Move pages	
Page caching	
Page copying	
Page restore	
Page search	
Page security	
Page statistics (screen + excel)	
Pages based on skins & stylesheets	
Search engine friendly url's	
Sitemap creation	
SSL on page level	
Task lists	

Datapart management	
Add/modify/delete dataparts	
Adding of datapart comments	
Autogenerated dataparts	
Cascading approve/publish	
Content reuse	
Content scheduling	

Datapart copying
Datapart restore
Datapart search
Datapart security
Dataparts based on skins & stylesheets
Delete instances
Delete protection
Editing cycle: check-out/edit/check-in/approve or disapprove/publish
Move dataparts
Task lists
UTF-8 support
Versioning

General management
Customizable user details
Document & image search
Document & image security
Image resizing & editing
Language matrix
Localization of the administration interface
Management of communities, domain names, sites and languages
Management of intranet/extranet users & groups
Management of page skins, content skins, stylesheets & containers
Management of structured data (multi-lingual) (News, Press releases, Jobs, Events, Products, ...)
Management of website administrators and roles
Mass upload
Metadada definitions
Plugin of new/custom modules
Plugin of custom applications
Preview & download of documents & images
Replication pool settings
Thumbnail creation
Upload documents & images
